HOW IT WORKS

When you pre-book our **GoPro video package** your raft will come equipped with one GoPro camera on the front of the raft and one on your guide's helmet. This way, the one on the front faces toward the guests on the boat and the other captures the whitewater ahead.

After your trip we upload your purchased footage online and send you a link via email where you can download your media and share with your friends/family and on social media!

for pre-book*

COST

1 person: \$50

2 people: \$60

3 to 5 people: \$90

Entire boat (6 to 8 people):
\$100

How many videos per trip?:

You can expect to have a minimum 5-6 videos per camera. (Guides can instruct guests when to turn on media for the most exciting portion of their trips.)

Technical glitch disclaimer: Please note that on rare occasions your raft's GoPro camera can potentially fail causing the loss of video files. In these unusual instances refunds are only available up to the actual cost of the video package pre-sale. No further refunds will be made available as the photo and video program is an added service offering.
